Description of Related Art With recent trend toward higher integration of semiconductor devices, size of wiring pattern formed on a semiconductor substrate is decreasing. On the other hand, in order to reduce power consumption of such a semiconductor device, especially a semiconductor device to which a CMOS process is applied, it is effective to reduce a threshold voltage of a MOS transistor. In order to reduce the threshold voltage of the MOS transistor, it is effective to increase doping density of the channel region. For example, since an ion implantation process using a high energy dose or an ion implantation process using a high concentration ion implantation technique is required to increase the doping density of the channel region, the substrate surface may be damaged by ions implanted to the channel region, and unwanted ion implantation may occur during the process of forming the transistor. In order to reduce the damage and the unwanted ion implantation, a technique of introducing nitrogen ions (N ions) to the channel region is disclosed. As shown in FIG. 13, a field insulating film 103 is formed on a silicon substrate 101. An insulating film 102 is formed on the field insulating film 103. A gate electrode 104 is formed on the insulating film 102 through a gate insulating film (not shown). Source/drain regions 105 are formed on both sides of the gate electrode 104 on the silicon substrate 101 through the gate insulating film. A capacitor lower electrode 106 and a capacitor upper electrode 107 are formed on the field insulating film 103. The capacitor lower electrode 106 is formed on e79caf774b

I have used hadoop jar oqplib.jar org.apache.hadoop.mapreduce.lib.input.FileInputFormat -input mydb.txt -inputformat org.apache.hadoop.mapred.TextInputFormat -output mydb.sorted.txt Now I am not able to use the above command as I am not sure how to use 'table' and 'MySQL' in the context of Map/Reduce as the examples all use it with word/phrase with which I don't know how to make use. Please help. Thanks. A: To clarify what you asked: "is there a way to map into a table and run a mapreduce on a table in mysql" Yes, you can do that using a JOIN between the map and reduce output. Example code: SELECT id, name FROM mytable INNER JOIN mapReduce(select id from mytable where name='abc') M ON mytable.id =M.id INNER JOIN reduce(select id from map where id =M.id) R ON
