Lg P769 Unlock with Octopus Box Cracked.[Perioperative treatment with magnesium is safe and effective for symptomatic conversion of paroxysmal atrial fibrillation into sinus rhythm]. Magnesium is widely used in the treatment of atrial fibrillation (AF), especially after the onset of AF. However, at present there are no available data about the safety and effectiveness of perioperative (during the operation and within 48 hours) and interventional treatment of AF with magnesium.

The aim of this prospective, randomized trial was to evaluate whether perioperative magnesium therapy in sinus rhythm maintenance is safe and effective. Thirty patients with persistent symptomatic AF who were undergoing surgery with extracorporeal circulation were included in the study. Randomization was performed to either preoperative intravenous magnesium or placebo administration. In case of sinus rhythm maintenance, the maintenance protocol included: i) oral magnesium (128 mg/24 hours) for up to 48 hours; ii) if magnesium was not effective, intraven c6a93da74d
