# FI Depth Of Field Plugin For After Effects Free! !NEW!

depth of field is a critical component of camera lenses. it is heavily used in photography, film and computer graphics as a creative element, in typical examples ranging from portraiture to macro photography. depth of field is governed by three factors: aperture, lens focal length and shooting distance. many consumer class cameras, however, do not provide sufficient and independent control of these parameters. digital cameras, in particular, usually show a wide depth of field i.e. they are more tolerant to defocus effects. while this may be welcome in some instances (e.g. snapshot applications), it is often a serious deficiency in others (e. portraiture/macro photography). dof pro (depth of field generator pro) is the undisputed leader in photorealistic depth of field effects for adobe after effects. backed by over a decade of research and development since its first release in 2005, dof pro has become the industrys professional choice for unparalleled and sophisticated depth of field effects quickly and efficiently as a post process. dof pros state-of-the-art featureset provides innovative and cutting-edge technology not available elsewhere, resulting in one of the most powerful and advanced depth of field processors in the industry. dof pros matte box affects bokeh exactly the same way real matte boxes do. they increasingly crop bokeh as they near image edges. each individual top, bottom, left and right fins has its own slider for 100% creative control over the cropping. dof pros matte box is for those looking to match exactly how real bokeh are influenced under these real-world conditions. it is also ideal for matching plates not otherwise possible with any other depth of field processor.

rendertime and produce unrealistic results. although the slider has a maximum limit of 45.0, a value greater than and up to 255.0 can be manually entered. dof pro is a production tested plugin currently being used by customers worldwide demanding the very best in depth of field effects. users range from digital artists and photographers to major broadcast, film and print production studios. dof pro has been developed with quality

---

output being the number one priority to produce the most sophisticated and photorealistic depth of field effects possible as a post process thus providing a faster alternative to computationally-intensive traditional 3d raytracing techniques. for photographers and retouchers, it is an alternative to already-captured photography lacking sufficient depth of field, or for those wishing to emphasize it further. it has been developed closely

---

with users and production studios in an effort to meet the digital community's creative demands. dof pro has been reviewed by numerous publishers world-wide, always receiving outstanding reviews, honorary mentions and feature publications. most important of all, dof pro has become the chosen tool for uncompromised, photorealistic depth of field effects. 5ec8ef588b
